

- ➔ Spreader Sticker
- ➔ Wetting Agent
- ➔ Adheres water droplets to plants
- ➔ Completely glyphosate and pesticide compatible

# Rivet 90

## NONIONIC SURFACTANT

---

RIVET 90 PROVIDES MORE UNIFORM SPRAY COVERAGE AND IMPROVES CHEMICAL ABSORPTION AND EFFICACY WHILE REDUCING EVAPORATION BEFORE PLANT UPTAKE

---

**RIVET 90** is the superior Nonionic Surfactant on the market with class leading performance in numerous different applications when applied with defoliant, herbicides, insecticides, and fungicides.

**RIVET 90** reduces surface tension, enabling your spray droplets to spread out over the entire surface of the plant.

**RIVET 90** slows the rate of evaporation and protects from environmental degradation, causing a greater percentage of chemical to successfully make it to the desired target.

### **DESIGNED BY FARMERS FOR FARMERS**

Rivet 90's on-farm design and testing is what separates it from the competition. Rivet 90's farmer plus chemist engineering allows the product to quickly spread a uniform pattern on the weed surface, drastically enhancing the absorption of the spray. The anti-foam and solubility properties included in Rivet 90 make tank loading more efficient.

### **APPLICATION**

The recommended application rate is 1 to 2 quarts per 100 gallons of water. Always follow chemical label recommendations for nonionic surfactant.
