

COMBO7

INFLUENCE SPRAY AID WITH LOW ODOR TECHNOLOGY

High Performing Surfactant

HOW IT WORKS

Combo 7 is a nonionic, low foaming penetrant/surfactant, which may be used to enhance the activity and effectiveness of spray applications.

ADVANTAGES

Combo 7 shows drift control properties by improving deposition and uniform spray pattern. Provides more uniform spray coverage by reducing surface tension and aid in penetration.

APPLICATION

- Non-Crop Sites: 1 to 8 pts. per 100 gal. (1 to 6 fl. oz. per 5 gal.) of spray mixture.
- Herbicides, Defoliants, Desiccants: 1 to 4 pts. per 100 gal. of spray mixture when used as a surfactant/penetrant.
- Insecticides, Fungicides, Acaricides, Plant Growth Regulators: 1/2 to 2 pts. per 100 gal. of spray mixture.
- Turf and Ornamental: 1 to 4 pts. per 100 gal. (1 to 3 fl. oz. per 5 gal.) of spray mixture.

Acidifying Agent

- pH 8.0 = 8-16 oz/100 gal. of spray solution
 - pH 6.5-8.0 = 4-8 oz/100 gal. of spray solution
- See product label for complete usage rates.

- ▶ Provides uniform spray coverage
- ▶ Wide variety of agricultural applications
- ▶ Enhances activity and effectiveness of spray chemicals
