

ShackLock

NON-AMS CHELATING WATER CONDITIONER & DRIFT CONTROL

Chelates metallic ions, wetting agent/nonionic surfactant, drift control.

HOW IT WORKS

ShackLock is industry leading triple mode adjuvant technology. With ShackLock, you go to the field with our expert chelating water conditioner, proven to not contribute to volatility, paired with our next generation polymer drift control, and premium wetting/surfactant technology.

ADVANTAGES

Using ShackLock, you reduce product needed for tank mixing, while lowering cost per acre and getting tremendous results with all of today's new chemistries.

APPLICATION

The recommended glyphosate application rate is 2-8 quarts per 100 gallons of spray mix. See product label for complete usage rates.

- ▶ Easy to use all-in-one technology
- ▶ Reduces amount of product needed for tank mixing
- ▶ Chelates metallic ions
