

## NON-AMS WATER CONDITIONER & ENCAPSULATOR

---

Non-AMS water conditioner, encapsulator, and drift control combo containing non-AMS water conditioning benefits.

---

### HOW IT WORKS

Shackle EXT is for tank mixes where water conditioning is needed and traditional methods are not approved. Shackle EXT contains our industry exclusive residual encapsulation technology that increases the life and effectiveness of chemicals that have residual properties. Shackle EXT also contains our next generation polymer drift control technology, which improves coverage, decreases evaporation, and increases canopy penetration.

### ADVANTAGES

This proprietary combination provides ultimate water conditioning and drift control while protecting pesticides from degradation resulting in improved residual effectiveness.

### APPLICATION

The recommended application rate is 2-8 quarts per 100 gallons of water. Always follow chemical label recommendations for water conditioners.

-  Safe option to apply without the risks of more volatile water conditions
-  Encapsulation technology
-  Improves coverage and decreases evaporation
