

CONDENSE^{+DRA/VRA} COMPLETE 1.6

NON-AMS WATER CONDITIONER, HUMECTANT, SURFACTANT, DRA & VRA

NEW AND IMPROVED WITH A LOWER USE RATE

HOW IT WORKS

Condense Complete 1.6 is a new, all-in-one formula, primarily engineered to meet your dicamba spraying needs. This improved formula adds a higher performing surfactant, additional defoamer, and the industries top rated Drift Reduction Agent (DRA) + Volatility Reduction Agent (VRA) technology. The VRA technology includes buffering agents, which aid in maintaining the right pH in the tank mix solution to reduce volatility. It also has the added benefit of being an ammonia free, complete water conditioner that chelates with all metallic ions, including calcium. Condense Complete 1.6 creates an optimal sized spray droplet and slows down the evaporation to enhance the time for chemical uptake of active ingredients.

ADVANTAGES

Condense Complete 1.6 is the highest rated DRA + VRA, proven to be compatible with a wide range of tank mixes. Ultimately, it is a simple, all-in-one formula, creating a quick and easy tank mix for versatile applications. With raw ingredients that are easily accessible during this supply chain shortage, you can always count on Condense Complete 1.6 for your spray needs.

APPLICATION

For general use as a DRA: 1.0-1.5% v/v

When spraying Engenia®: 1.5% v/v

When spraying Tavium® Plus VaporGrip® Technology: 1.5% v/v

When spraying XtendiMax® Herbicide with VaporGrip® Technology: 1.6% v/v

- ▶ Total DRA & VRA, all-in-one formula
- ▶ Contains no NPE & APE
- ▶ Highest rated for compatibility & efficacy
