Magnesium (Mg)	0.05%
Zinc (Zn)	0.10%
Humic Acids	2.4%

Density: 9.95 lb/gal

GENERAL INFORMATION

Match Strike is designed to break through yield limitations by providing a great boost of readily available sulfur and nitrogen, coupled with nutrients required for optimal growth.

Magnesium, Zinc, Manganese and Iron all play an important role in photosynthesis, making the sidedress application a crucial time for nutrient availability to the plant.

USE RATE

- Use Match Strike at 0.5 to 1 gallon in-furrow.
- 1-3 gallons side dress or over the top, if the crop is dormant.
- Match Strike can cause phytotoxicity when used as a foliar.
